Customer Problem Statement Template:

PROJECT: ShopEZ – E-Commerce Platform (Persona 1)		
I am	Describe customer with 3-4 key characteristics – who are they – who are they?	An online shopper looking for products to buy. 22–35 years old, tech-savvy, values convenience and good deals, shops online regularly.
I'm trying to	List their outcome or "job" – tell us what – where – about – what are they trying to achieve?	Find and purchase the best products at the best price with a smooth and secure shopping experience.
but	Describe what problems or barriers stand in the way – what blocks them now?	Product information is scattered across multiple websites, hard to compare prices, no reliable reviews, and checkout is complicated.
because	Enter the "real cause" of why problem or barrier exists – what needs to be solved?	There is no centralized platform that offers verified products, clear details, reviews, secure payments, and order tracking in one place.
which makes me feel	Describe the emotions from the customer's point of view – how does it impact them emotionally?	Frustrated, time-wasted, and uncertain about product quality and delivery.
PROJECT: ShopEZ – E-Commerce Platform (Persona 2)		
I am	Describe customer with 3-4 key characteristics – who are they – who are they?	A seller or admin managing the store on ShopEZ. 25–45 years old, business-minded, manages inventory, products, and orders.
I'm trying to	List their outcome or "job" – tell us what – where – about – what are they trying to achieve?	Reach more customers and manage products, inventory, and orders efficiently to grow my business.
but	Describe what problems or barriers stand in the way – what blocks them now?	Traditional advertising is expensive and ineffective. Managing products, stock, and orders manually is time-consuming and error-prone.
because	Enter the "real cause" of why problem or barrier exists – what needs to be solved?	There is limited visibility, inefficient communication, and lack of streamlined tools for inventory and order management.
which makes me feel	Describe the emotions from the customer's point of view – how does it impact them emotionally?	Stressed, overwhelmed, and dissatisfied with current manual processes and low business growth.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A shopper looking to browse and prepare a cart of items before registering	Add products (like fashion wear or electronics) to my cart while browsing the catalog, and then check out.	I cannot add items to the shopping cart as a guest and am forced to redirect to the authentication screen immediately.	The cart state is strictly synchronized with the MongoDB database using an active userId, which does not allow guest checkouts or local session carts.	Restricted and hesitant, as I would prefer to build my cart first before committing to creating an account.
PS-2	A store manager (Admin) tracking orders and managing the inventory catalog.	Seamlessly promote active users to admins, track order execution statuses, and view live revenue metrics.	Seamlessly promote active users to admins, track order execution statuses, and view live revenue metrics.	The user promotion success message shows undefined names, and the metrics require manual reloads to update.	The backend promoter logic uses a mismatched schema property (user.name instead of user.username), and the database lacks real-time webhook/websocket triggers.
