Maximum Marks	

Project Overview

- **Project Name:** SHOPEZ : E-commerce Application
 - **Project Description:** A full-stack MERN stack application providing secure user authentication, a product catalog with search/filter/sort parameters, a persistent shopping cart synced with MongoDB, simulated checkout invoicing (GST + delivery charges), an active order tracking panel, and a dedicated admin console with inventory CRUD tools.
 - **Project Version:** 1.2.0
 - **Testing Period:** 15 June 2026 to 18 June 2026
-

Testing Scope

- **Features and Functionalities Tested:**
- User Registration & Login (Dual pathways: Customer & Admin configurations)
- Dynamic Product Catalog (Search bar inputs, Category checkboxes, Gender toggles, Price/Discount radio filters)
- Persistent Cart Management (Quantity additions, removals, database sync)
- Checkout Form & Invoice System (Automatic 18% GST calculation, Free shipping above ₹999, UPI/Card/COD methods)
- User Profile Transaction Records (Past orders status trackers, cancellation requests)

- Admin Workspace (Sales revenue metric charts, Product CRUD forms, User account list, Promote/Delete user hooks)
- **User Stories / Requirements Verified:**
 - As a user, I want to search and filter products so that I can find items quickly.
 - As a registered customer, I want my cart to stay saved across devices.
 - As a user, I want to cancel my order if it has not been processed.
 - As an admin, I want to add or modify products and track revenue metrics.

Testing Environment

- **URL/Location:**
 - Frontend Client: <http://localhost:5173> □ Backend REST API: <http://localhost:8000>
- **Credentials Used for Testing:**
 - **Customer User:** Email: customer@shopez.in / Password: customer123
 - **Admin User:** Email: admin@shopez.in / Password: admin123

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Authentication & Routing	1. Navigate to /auth 2. Enter credentials for Customer 3. Click "Login"	Token is saved in local storage, dropdown avatar shows username, page redirects to catalog.	Token saved, username successfully loaded, redirected to catalog.	Pass

TC-002	Product Filtering & Searching	1. Enter "Iphone" in search bar	Search results show only iPhone	Displayed matching iPhone model listings,	Pass
Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
		2. Select "mobiles" category checkbox 3. Select "Price: High to Low" radio	products, sorted by highest final price first.	filtered by category and sorted correctly.	
TC-003	Persistent Shopping Cart	1. Add "Sony WH-1000XM4" to cart 2. Increase quantity to 2 3. Reload browser and check cart	Cart updates quantity in the MongoDB cart collection. Cart item count persists on reload.	Quantities adjusted in database. Cart content preserved upon browser refresh.	Pass
TC-004	Order Checkout & Calculations	1. Open checkout page 2. Fill delivery details 3. Verify MRP, GST (18%), delivery cost, and place order	Invoicing matches arithmetic constraints. Subtotal matches database values, and cart is wiped.	Calculations checked (Free delivery triggered for ₹1000+ orders). Cart cleared after checkout.	Pass

TC-005	Admin Product Inventory CRUD	1. Log in as admin 2. Navigate to Admin Area -> Product Management 3. Add new product and verify list	Product is saved to MongoDB Products collection and shows up immediately in the catalog grid.	Product created in database and rendered successfully in both admin lists and customer grid.	Pass
--------	------------------------------	---	---	--	------

Bug Tracking

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Promote to Admin displays undefined name in success alert.	1. Log in as Admin. 2. Go to Admin -> Users list. 3. Click "Promote to Admin" on a user.	Medium	Open	The API returns: <i>"User 'undefined' has been promoted"</i> . Caused by user.name reference instead of user.username in adminController.js (182).
BG-002	Product reviews do not persist in the database.	1. Open product details page. 2. Write a review and click "Submit".	Low	Closed	The Mongoose Schema does not support review array objects; currently stubbed in controller. Works on client-side state only.
